

Rule Book for Code Crafter Hackathon 3.0 Organized in CT University

Introduction

The Hackathon is an innovation-driven event where students collaborate to develop solutions for real-world problems using technology. The event promotes creativity, problem-solving, and teamwork among participants.

General Instructions

- The hackathon is open to all Colleges and University students.
- Participants can compete in teams of up to **2 - 4 members**
- **Registration Fee: ₹500 per team.** Registration is mandatory and must be completed before the deadline.
- **Accommodation and food facilities will be available for all participants.**
- **The hackathon will begin on 23rd April at 09:00AM and end on 24th April at 01:30 PM.**
- Participants must remain at the hackathon venue for the entire duration of the event.
- Participants are allowed to use any tools or resources they want, including their own laptops, phones, and tablets.
- **It is mandatory to bring your own laptops and devices (BYOD).**
- Mentors will be allotted to each team participating in hackathon.
- However, participants are not allowed to use any pre-existing code or projects.
- All projects must be created from scratch during the hackathon.

Team Formation

- Teams must be formed before the hackathon begins.
- Each team must appoint a leader who will be the primary point of contact.
- No participant can be a member of multiple teams.

Themes & Problem Statements

- Problem statements will be announced at the beginning of the hackathon.
- Participants must select a problem statement and develop a solution accordingly.
- Innovative and original ideas are encouraged; plagiarism is strictly prohibited.

Hackathon Duration

- The hackathon will run for **24 hours**.
- Participants must complete and submit their projects within the given timeframe.

Development Guidelines

- Projects must be developed during the hackathon period.
- Teams may use any programming languages, frameworks, and tools.
- Open-source libraries and pre-built APIs can be used, but proper attribution is required.
- The use of AI-generated code must be declared and justified.

Submission Criteria

- Teams must submit their project via the designated submission portal.
- Required submission materials:
 - Project code repository (GitHub, GitLab, etc.)
 - Documentation (ReadMe file including setup instructions)
 - Presentation slides (maximum 10 slides)
 - A demo video (3-5 minutes explaining the project)
- Late submissions will not be accepted.

Judging Criteria

Projects will be evaluated based on:

- **Innovation (20%)** – Uniqueness and originality of the idea.
- **Functionality (20%)** – How well the project works and meets objectives.
- **Technical Implementation (20%)** – Code quality, architecture, and efficiency.
- **User Experience (20%)** – Ease of use and design aesthetics.
- **Presentation & Pitch (20%)** – Clarity of communication and demonstration.

Prizes & Recognition

- Winning teams will receive **certificates, trophies, Medal, and cash prizes.**
- All participants will receive participation certificates.

Code of Conduct

- Participants must adhere to ethical hacking principles and avoid any form of cheating.
- Harassment, discrimination, or inappropriate behaviour will lead to disqualification.
- Any disputes or conflicts must be reported to the organizing committee immediately.

Intellectual Property & Ownership

- The intellectual property rights of the projects remain with the participants.
- By participating, teams agree to allow the organizers to use their project details for promotional purposes.

Additional Rules

- Participants are allowed to take breaks, but they must be back at the hackathon venue within 30 minutes. Participants are not allowed to leave the hackathon venue without permission from an organizer.
- Participants are not allowed to sleep at the hackathon venue.

Disqualification

Teams may be disqualified for:

- Submitting plagiarized or pre-built projects.
- Engaging in unfair practices.
- Violating the event rules or Code of Conduct.

Additional Tips

- Be prepared. Think about what kind of project you want to work on before the hackathon starts.
- Be collaborative. Hackathons are a great opportunity to work with other talented students and learn from each other.
- Don't be afraid to ask for help. The organizers and mentors are there to help you succeed.
- Have fun!! Hackathons are a lot of work, but they're also a lot of fun. Enjoy the experience and learn as much as you can.

Contact Information

For any queries or concerns, participants can reach out to the organizing committee via **Email: - techverse@ctuniversity.in**
